Department of Geography

2020 - 21

1) Titled of the Practice –

“Gps Survey of Sagareshwar Sanctuary”

2) Objectives –

- 1) To know and mapping the Latitude and Longitude of the placed or things made by nature or man.
- 2) To the understand at B.A III Student While get Knowledge about gps

3) The Context-

Generally people in the society where unfamiliar about the geographical location of a place. The Geographical location is and impotent aspects as compare about the climatic condition. Any location on the earth has absolute and relative location.

4) The Practice –

This practice is new concept which is bested on science and technology. The subject like geography has an important in the field studies therefore the and the compounds of GPS where included in the curriculum of geography at B.A part III

The practical batch of this class thought about the Knowledge of the GPS. Then student where go throw the knowledge and the practical of this instruments and implements in the field survey. Same times and error has been faced at the time of survey. It happen do to hilly region and mountain region in the rang of the satellite

5) Evidence of Success:

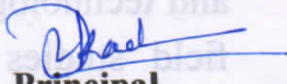

6) Problems encountered and Resources Required:

College campus entire most of student was enrolled in the department came from rural area. Most of student not introduces the recent trend and modern technology in geography. Most of rural area student no speaking English language

The GPS system was strongly active for minimum four satellite signals available in the area. Hilly region and mountain area not capture gps signals and error for GPS.

7) Notes (Optional) : No
