A Report of Botanical Excursion 2019-20

Date: 22/02/2020

In the academic year the Department of Botany had organized a Botanical Excursions to the different places on 23/01/2020 and 17/02/2020. This Excursions were conducted according to the guidelines of Rayat Shikshan Sanstha Satara and Excursion committee. Students from B.Sc. I and II were visited to Ratnagiri, Sindhudurg, Malvan, Kunkeshwar and Pawas. The excursions were ended with pleasure and students satisfaction.

Objectives of the Excursions:

1. Broaden students horizons and knowledge through the introduction of tropical plant diversity, especially seed plant.
2. Apply knowledge and skills acquired in the lecture and laboratory.
3. As a training tool for the planning and implementation of direct observation of specimens in their habitat.
4. Explore the possibility of a chance to do research (or collaboration).
5. Strengthen the friendship among students, and between students and lecturers.

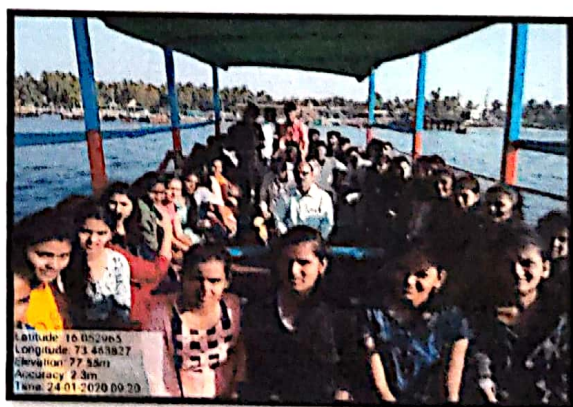

Outcomes:

Learning science from first-hand information through observation at the field is much important in making the subject unforgettable and long-life understanding. Such practical activity is used for relating the concepts with actual life of the students. Thus the trip for field study at Botanical Garden and Shailesh Nursery played greater role for students to appreciate nature, learn more about phanerogamic plants and learned from the trip about the management of plants, organization of plants in the garden, how botanical gardens play role for education purpose, and how to involve students practically in field study.

Beneficiaries: Students=60, Escort=04
