National Cadet Corps A Report on No Vehicle Day

To fight against air pollution and save environment it was decided to observe no vehicle day on every fourth Saturday of month. With this determination we observed a no vehicle day in the college. On this day the Teaching, non-teaching staff and all students intentionally avoided use of any private vehicles to reach the college. Instead of this they used bicycles and Public transport. N.C.C candidates helped in the organization on the program. They also guided the other students about the sake of environment.

Outcome –

The less use of motor vehicles can help to decrease air pollution. With the less air pollution every being can breathe fresh air.

Beneficiaries

Students -719
Teaching Staff -62 Non-Teaching -17
