## DEPARTMENT OF BOTANY

*Organized*

## HERBARIUM EXHIBITION

### Report

Date: 02/03/2024

The Department of Botany had organized a herbarium exhibition for the students of B.Sc. I and B.Sc. II on 02<sup>nd</sup> March, 2024. This exhibition was successfully undertaken under the guidance of Hon. I/C Principal Dr. U.V. Patil, Miss. A.B. Mamlayya Head, Department of Botany and other faculty members. The herbarium serves as an aid in teaching botany to degree and post-graduate students. It is difficult for any student to identify local plants without the help of a proper herbarium. Many specimens, which the teacher would like to show to his students, may not be available fresh at the time of giving the course. In such situations, available specimens in the herbarium serve the purpose.

An herbarium is a collection of dried plants that botanists use for studying, identifying, and classifying plants. Making an herbarium is a great way for students to learn about botany and the plants used in herbalism. An herbarium will help students get to know what plants look like, along with improving identification and wildcrafting skills. Enjoy exploring nature and working on this herbarium project together!

### Outcomes:

1. Proper herbarium was helpful to identify local plants.
2. It gave the knowledge of all plants and their characteristics, identification, classification.

### Beneficiaries

34 Students
